Career Summary

Software Engineer with over 2 years of hands-on experience in web application development and management systems, specializing in the Laravel Framework. Proficient in designing and implementing RESTful APIs, building scalable backend systems, and contributing to end-to-end project development. Currently seeking to transition into a Full Stack Web Developer role, expanding expertise into modern front-end and back-end technologies, including NestJS, ReactJS, and VueJS. Committed to continuous learning and delivering high-quality.

Work Experience

- PHP Developer - Gonsa – Transport Management System | 11/2023 – Present
- Developed and deployed backend APIs for delivery and order management.
- Integrated SAP, WMS, and NEOX systems to improve operational efficiency.
- Optimized backend performance using Laravel 8.
- **PHP Developer** - Warehouse Management System (Nissin & Elmich) | 04/2023 – Present
- Designed and developed intelligent APIs for warehouse operations, including inventory tracking and optimization of goods movement.
- Utilized Laravel 8 to ensure high performance and system stability.
- Intern - VNPT Internship | 05/2022 – 08/2022
- Developed a student management system with CRUD features and reporting.
- Built the entire backend using **Laravel**.

Education

- University of Information Technology | 09/2018 – 09/2022
- Major: Software Engineering | GPA: 3.29/4.0

Professional Skills

- Programming Languages & Backend Frameworks: **Laravel**, Magento, Node.js (basic NestJS)
- Frontend Skills: Vue.js, React.js (basic), Tailwind CSS
- Database Management: MySQL, SQL Server
- Development Tools: Docker (basic), Git, GitLab, Ubuntu Server (basic)
- Languages: Proficient in reading and understanding English technical documentation

Key Projects

1. **Warehouse Management System (Nissin, Elmich, and FMT)**
   Developed APIs for smart warehouse operations, including intelligent picking, inventory tracking, and optimizing goods import/export. Implemented features for statistical reporting and efficient warehouse management.
   Technologies: PHP (Laravel 8) (FMT upgrade Laravel 8 to Laravel 10), Vue.js, MySQL
2. **Gonsa – Transport Management System** - **11/2023 – Present**
   Built backend APIs for delivery and order management, integrating SAP, WMS, and NEOX systems.
   Technologies: PHP (Laravel 8), Vue.js, MySQL
3. **BigCamera – E-Commerce Website** - **11/2023 – 02/2023**
   Customized Magento modules for an e-commerce platform selling cameras.
   Technologies: PHP (Magento 2), HTML5, CSS3, MySQL

4. **Sky Premium – E-Commerce Platform** - **10/2022 – 11/2023 (The time I joined)**
   Contributed APIs and debugged issues on a Magento-based system with CRM and mobile integration.
   Technologies: PHP (Magento 2), ReactJS, Java (Mobile), FreshWorks CRM, REST API, MySQL
5. **Student Manager System – VNPT Internship** - **05/2022 – 08/2022**
   Built features for managing student registration, timetables, and transcripts, with CRUD operations for teachers and admin.
   Technologies: PHP (Laravel 7), HTML, Bootstrap, CSS, JavaScript, jQuery, MySQL
6. **Men's Fashion Store – Graduation Thesis** - **01/2022 – 04/2022**
   Developed a full e-commerce platform with user authentication, a cart, and an admin panel. Integrated VNPay and Google/Facebook login.
   Technologies: PHP (Laravel 7), HTML, Bootstrap, CSS, JavaScript, MySQL, VNPay
